

# WEB 224 Final Project Documentation

**Members:** Raven C. Magbanua  
John Andrei S. Manansala

**Section:** BSCpE-2B

**Website Title:** "FurFriends"

## Main Objective

The main goal of developing FurFriends is to help people who love dogs and cats. It's like a big library with lots of information about these animals. You can learn all kinds of things about their behavior and how to care for them. But it's more than just a library. The website also wants to bring people together. If you love dogs or cats, you can connect with others who feel the same way. You can share stories, ask questions, or just chat with people who also love these furry friends. In short, the website aims to be a friendly place where dog and cat lovers can learn, connect, and have fun together.

## Functionalities and Features

The FurFriends website has a special feature called the "Dogs and Cats Libraries," where users can find a wealth of information about different dog and cat breeds. This feature helps users learn about their favorite pets, including their traits, behaviors, and care needs. Whether you're interested in the energetic Labrador Retriever or the graceful Siamese cat, the libraries offer detailed insights to feed your curiosity. Besides the extensive breed libraries, FurFriends also has a premium chat feature. This tool lets users connect with other pet lovers from around the world. Through real-time conversations, users can share experiences, get tips, and give advice. Whether you're looking for training tips for your new puppy or discussing grooming methods for your fluffy cat, the chat feature creates a lively community where pet lovers can support and inspire each other. Join FurFriends today and enjoy connecting with people who share your love for dogs and cats!
